SIXTY SEVENTH ANNUAL SHORT COURSES
FOR WATER & WASTEWATER OPERATORS
June 5 – June 10, 2016

HELD
AT
WASHINGTON COLLEGE
300 WASHINGTON AVE,
CHESTERTOWN, MARYLAND

Sponsored
By
Chesapeake Section, American Water Works Association
Chesapeake Water Environment Association
Water and Waste Operators Association of Maryland, Delaware and the District of Columbia
Important Reminder: A refundable $10.00 key cash deposit will be collected at the time of registration. However, students will be billed $60.00 for lost keys.

4:00 p.m. to 6:00 p.m. Organization Check-in and Signup  
Registration and Room Assignments

6:00 p.m. to 11:00 p.m. The Short Course will begin with a Buffet Dinner at 6 p.m. in the Main Dining Room located in Hodson Hall followed by a Meet and Greet beginning at 7:30.

Monday, June 6 through Thursday, June 9, 2016

7:00 a.m. to 8:00 a.m. Breakfast for Non-commuters

8:00 a.m. to Noon  Training Sessions

Noon to 1:00 p.m. Lunch for all Attendees and Trainers

1:00 p.m. to 5:00 p.m. Training Sessions

5:00 p.m. to 6:00 p.m. Dinner for Non-commuters

Friday, June 10, 2016

7:00 a.m. to 8:00 a.m. Check-out, Key Return  
Breakfast for Non-commuters

8:00 a.m. to 11:00 a.m. Final Short Course Exam - All sessions

OR

9:00 a.m. to Noon Maryland Board of Water and Waste Systems Operators Certification Exams for those scheduled*
Directions to Washington College
Washington College is located in historic Chestertown, Maryland on Maryland’s Eastern Shore north of Centreville on US 213. The College is on the west side of the highway and is well marked. Directional signs to the Short Course will be provided.

Purpose
The Short Course for Water and Wastewater Operators offers training, information, and insights that will enable the water and wastewater systems personnel to operate their facilities in a more effective, safe, and economical manner. The courses offer new ideas and serve as a “refresher” for existing operators.

Non-Discrimination Statement
The WWO Short Course Committee does not discriminate in its educational programs or activities on the basis of race, color, national or ethnic origin, ancestry, age religion or religious creed, disability or handicap, sex or gender (including pregnancy, sexual harassment and other sexual misconduct including acts of sexual violence such as rape, sexual assault, sexual exploitation and coercion), gender identity and/or expression. The Short Course will comply with state and federal laws such as M.G.L.c.151B, Title IX, Title VI and Title VII of the Civil Rights Acts, the Americans with Disabilities Act, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination in Employment Act, and other similar laws that prohibit discrimination.

Unlawful discrimination has no place at the Short Course and offends the organization’s core values which include a commitment to equal opportunity and inclusion. All Short Course Committee Members instructors, students, and staff members are expected to join with and uphold this commitment.

Questions/Problems
If there are any questions not answered in this brochure or problems encountered prior to registration, you can contact Ed Williams at rewilliams@harfordcountymd.gov, or Rachel Ellis (443) 924-4671, Monday through Friday, 8:00 a.m. – 5:00 p.m.

Washington College
The College’s only function is to provide facilities for the courses. The College should not be contacted regarding registration or arrangements. All questions should be directed to the above named individuals or Short Committee members.

Course Registration
Full registration fees include the Sunday evening dinner, all classroom instruction, course materials, lunches and refreshments at the breaks Monday through Thursday.

Short Course registration is now PAPERLESS! Mail-in registration will NOT be accepted.

How to Register:
1. Gather all required information for each attendee being registered:
   a. Email Address
   b. Registration type: Member of one of the organizations (WWOA, CSAWWA, CWEA), or Non-member
   c. First Name, Last Name
   d. Company/organization
   e. Address
   f. Work Phone
   g. Gender
   h. Emergency contact phone #
   i. Payment type: Credit card, check, or scholarship winner
   j. If attendee plans to arrive on Sunday
   k. If attendee plans to attend the Sunday buffet
   l. If a member, which organization (WWOA, CSAWWA, CWEA)
   m. Membership #
   o. Type of registration (Full week w/room & board, full week w/o room & board, or single day)
   p. Credit card information (if using credit card for payment)
2. Link to our online registration system by visiting www.wwoa-cwea.com
3. Complete individual or group registrations
4. Pay – see below
5. Print your invoice – no invoice will be mailed to you!

Payment
- Pay online using credit card or EFT - you can register a group of attendees using one credit card.
- Pay by check. Checks should be made payable to Short Course, and mailed to the address shown in the Online Registration System. (Include all attendee names with your check).

Payments not made within 45 days of the course (July 25, 2016) will be charged an additional processing fee of $50.00. Cancellations will be assessed a fee of $10.00.

NOTE: Certificates of attendance will not be issued until full payment has been received.

On-Site Help
If you are a single day or late registrant, an instructor, or if you have any questions/problems during the week, you can find help in the Short Courses Staff Room located in Room 106 in the Daly Building from 7 a.m. to 5 p.m. The phone number is (410) 810-5090, during class hours 7 a.m. to 5 p.m. or you can ask any Short Course Committee member to assist you. Should someone need to reach you in an emergency the Public Safety Office phone number is (410) 778-7810. The 24-hour lockout/guest assistance number is (410) 699-1883
* Maryland State Operator Certification Exam

This year the Maryland Board of Water and Waste Systems Operators will hold operator certification exams for all classes at the conclusion of the Short Course on Friday, June 10, 2016, from 9 a.m. to Noon. This exam is separate from the TRE credit exam given by each session of the Short Course.

Payment to attend the Short Course does not include the cost nor entitle you to take the Maryland Certification Exam! *You must apply separately to the Maryland Board to sit for the Maryland Certification Exam.* The Board must receive the application for those wishing to take the Certification Exam at Washington College by May 15, 2016. **No more than 100 applications will be accepted for this exam.** It is suggested that you register early for the State exam. Mail completed application to:

Board of Waterworks & Waste Systems Operators
P.O. Box 2057
Baltimore, MD 21230-1708

Any questions regarding the Certification Exam may be referred to Mr. Lawrence Robinson at 1(800) 633-6101, ext. 3167 or 1(410) 537-3167. **Note: The State exam will be held at 9:00 a.m. in the Hynson Lounge located in Hodson Hall Commons. Payment for the Short Course does not include the cost of nor entitle you to take the Certification Exam!**

**Sponsorship/Scholarships**

The Annual Water and Wastewater Operators Short Course is sponsored by the Short Course Committee, a group made up of representatives from the Water and Wastewater Operators of Maryland, Delaware, and the Distric of Columbia (WWOA), the Chesapeake Section, American Water Works Association (CSAWWA), and the Chesapeake Water Environment Association (CWEA). This training effort is sponsored by the professional membership organizations and the employers of the water and wastewater operating professionals. It is a volunteer organization. Should you wish to become a member please contact one of the Short Course Staff.

Scholarships may be offered through each organization to attend the Short Course. Members of each organization are eligible per the selection process of the organization.

**Overnight Room Accommodations**

Overnight accommodations will be available at a cost of $50.00 per person per night. This fee includes an air conditioned room with a limited linen package. The rooms will be available from 4:00 p.m. Sunday, June 5 and must be vacated by 8 a.m. on Friday, June 10. **A refundable $10.00 cash key deposit will be collected at the time of registration. However, students will be billed $60.00 for lost keys.** Room and board cost includes the standard all-you-can-eat cafeteria meals (breakfast and dinner) served in the Dining Facility at Hodson Hall. Lunch is included in the registration cost for all attendees.

Meals for on-site accommodations begin with the Buffet dinner on Sunday evening, June 5, and end with breakfast on Friday morning, June 10. The serving times are:

- **Breakfast** – 7 a.m. to 8 a.m.
- **Lunch** – Noon to 1 p.m.
- **Dinner** – 5 p.m. to 6 p.m.
Should you prefer to stay off campus, there are several motels nearby. Reservations must be made by you with the motel. If you wish to eat on campus, you must purchase the meal plan.

**Parking**
Please observe all parking restrictions at the college. All vehicles improperly parked on grass or prohibited areas will be given a ticket or towed.

**Smoking**
Smoking is prohibited in all college buildings including residential halls, and outdoors within 25 feet of all college buildings. **Violations will result in a $250.00 fine per occurrence.** Repeat violations may result in the loss of campus housing and/or campus visitation privileges.

**Emergencies**
If there is an **emergency** at home or work while you are staying at the College and you must be reached, the 24-hour Public Safety number is (410)778-7810. A message will be taken and every attempt will be made to contact you.

**Conduct of Participants**
Throughout the history of the Short Course most participants have conducted themselves in a most reasonable manner and are a credit to our profession. This is a reminder that all participants will act responsibly. Undesirable conduct will not be tolerated and will result in your removal from the site by campus police without refund. Notification to your employer and the cause for removal will follow.

In addition, anyone found unduly under the influence of alcohol, anyone found buying, selling, consuming, or possessing illegal narcotics and drugs will be required to leave this year’s Short Course immediately and will be banned from all future Short Courses. Unduly under the influence will be in the judgment of any Short Course Committee member or university official.

**Attendance and Training Credit Hours Earned**
The policy of the Short Course Committee is that a student must attend at least 80% of the training (Short Course examination being included in the total time – the State examination does not count as class attendance) to receive credit for full attendance. **All courses are subject to approval by the Maryland Board of Waterworks and Waste System Operators.** Also, 80% or better attendance along with a passing grade on the final examination, results in 1.5 times the full attendance credit. Attendees with less than 80% attendance or single day attendees will receive a certificate of attendance with the actual hours attended. The Short Course Committee does not submit individual classes for TRE credits. Attendees have the option to submit the hours for approval.

If you are taking a State Certification exam on Friday, June 10, and you are also interested in taking the Short Course final exam, you may do so Thursday evening. Only individuals taking the State Certification exam will be eligible for this option. You must make arrangements with the course coordinator by Tuesday, June 7. **All participants must sign their own name to the attendance sheets during the class to receive credit. NO EXCEPTIONS.**

**Disclaimer**
The Introductory Water and the Introductory and Intermediate Wastewater Sessions are designed for those persons just entering the field and persons holding temporary operator licenses. Attendance at this course in no way implies a guarantee that those participating in the sessions are assured of passing the State Certification exam. However, the information covered in the sessions should be helpful with some parts of the certification exam. Fully certified operators should take the more advanced sessions for re-certification credit however all sessions are submitted for TRE credits.

**Sunday Evening Meet & Greet**
On Sunday, June 5, 2016, the Short Course will begin with a Buffet Dinner and Meet and Greet in the Main Dining Facility in Hodson Hall. The buffet will be served from 6:00 p.m. until 7:30 with a Meet and Greet to follow until 11:00 p.m.

**Evening Recreational Activities (Hodson Hall)**

**Session Highlights**

**Introductory Water**
The Introductory Water Course is provided for those who work at any class water treatment plant but is primarily designed for those who operate Class 1 & 2 plants with disinfection/chlorination, pH control, and fluoridation. Generally these are small surface water and groundwater plants. The curriculum involves applied mathematics; basic concepts in water production and treatment, as well as maintenance and safety aspects associated with water treatment systems.

This course is Maryland Board/TRE #5877-16-03.

**Water – Classes 3 & 4**
The Water Class 3 & 4 is designed for those who operate plants with chlorination, pH control, flocculation, fluoridation, filtration, and iron removal utilizing ion exchange or contact oxidation processes (Class 3): and chlorination, pH control, fluoridation, aeration, coagulation, sedimentation, and filtration for both surface water treatment and complex iron removal (Class 4). Generally these are larger water plants. A person taking this course will have at least two or three years of operating experience and/or have completed a basic/introductory water course. This course is Maryland Board/TRE #5878-16-03.

**Advanced Water Topics**
The Advanced Water Topics curriculum is designed for water treatment plant operators. The course work is designed to investigate water treatment subjects and issues in greater detail than would be covered in introductory classes. Persons taking this course should be a certified operator with approximately four years or more experience in water treatment technology, and have completed basic introductory water courses.

This course is Maryland Board/TRE #5879-16-03.
**Water Distribution Systems**  
The Water Distribution Systems Courses are designed for those who operate and maintain a water distribution system. They are for both the beginner and seasoned operator, and will cover basic and advanced concepts. This course is Maryland Board/TRE #5880-16-03.

**Introductory / Intermediate Wastewater**  
The course is designed for the temporary certified operator with basic wastewater skills. The operator taking this course will generally have one to three years of operating experience. Information covered in this session should be helpful with some parts of the certification exams, but in no way assures one of passing. Due to a large majority of operators at this experience level taking the State certification exams, no final exam has been given for this session in previous years. This year we will again offer an exam for those not taking the State Certification test. This will limit the session to 32 TRE credit hours for those taking certification, but will allow for 32 plus 1.5x (16) credit hours for those passing the short course exam (for a total of 48 credit hours). Attendees have the option to take the State certification exam to be given on Friday, June 6. Pre-registration for the State certification exam is mandatory and is the sole responsibility of each operator. This course will make use of instructor handouts and note taking by the attendee. This course is Maryland Board/TRE #5883-16-03.

**Advanced Wastewater**  
This session is designed for certified wastewater operators. The person taking this class will have two or more years of experience and have completed a basic or introductory wastewater course. In addition, it serves as a refresher course for the seasoned veteran operator. **Experienced operators taking the certification exam should enroll for the Introductory/Intermediate Wastewater course.** Although some of these sessions are designed to review standard advanced wastewater process control, many of the sessions will discuss recent advancements in technology in an effort to expand the veteran operator’s knowledge beyond his/her own facility. This course is Maryland Board/TRE #5884-16-03.

**Wastewater Collection Systems**  
The Wastewater Collection Systems Courses are designed for those who operate and maintain a wastewater collection system. They are for both the beginner and seasoned operator, and will cover basic and advanced concepts. This course is Maryland Board/TRE #5881-16-03.

**Industrial Waste Treatment**  
The Industrial Waste Treatment Course is designed to cover a broad range of topics in the field. Review sessions for safety and chemistry are provided. The technology discussed will apply for both direct industrial waste dischargers and indirect dischargers to Publicly Owned Treatment Works (POTWs). The sessions during the first three days concentrate on chemical/physical processes and topics of general applicability. Thursday’s class focuses on biological treatment processes to address training requirements for Industrial Wastewater Works and Pretreatment Plants of Class 4, Biological Lagoons, and Class 5, Activated Sludge. The biological treatment class is approved Maryland Board/TRE # 5882-16-03.

**Superintendents/Managers**  
The Managers/Superintendents Course is designed for certified water and wastewater managers, supervisors, superintendents and experienced operators who have taken basic and advanced courses. This course was designed to meet the needs of managers and
superintendent’s re-certification and may be approved for other operators’ certification as well. This course is Maryland Board/TRE #5885-16-03.

**Delaware Operator License Holders**
Certified Delaware Operators can submit MDE approved courses for credit with Delaware.

**Session Listings**

**Introductory Water**

**Course Coordinator:** Rob Swann

**MONDAY**

8:00 – 8:30 a.m. **Overview** – Instructor, Rob Swann – Anne Arundel County DPW

An overview of the Introductory Water program will be presented and course objectives discussed. Textbooks will be distributed and the TRE requirements will be outlined. This course will cover the materials, which will be helpful to students new to the water industry as well as those who will be taking the Class 1 or 2 State Certification Exam for Water Treatment.

8:30 – Noon **Basic Instrumentation** – Instructor, Gary Anderson – Sherwood Logan and Associates, Inc.

This course is offered as a basic overview of the concepts and techniques for four of the most often encountered measurements found in water treatment plants: temperature, pressure, level, and flow. The class will learn the theory behind each measurement and become familiar with the diversity of instrumentation available.

Noon – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **Water Treatment Processes** – Instructor, Eddie Cope – Anne Arundel County DPW

This session will cover various water treatment processes including coagulation, sedimentation, disinfection, fluoridation, iron and manganese removal, softening, taste and odor control, and corrosion control. Water sources, chemicals used in water treatment and plant operations will also be discussed.

5:00 – 6:00 p.m. **DINNER**

**TUESDAY**

8:00 – Noon **Applied Mathematics** – Instructor, Scott Harmon – Anne Arundel County DPW

This session will focus on basic mathematics and application fundamentals to the water treatment industry. Upon completion of this
course, personnel should be able to perform calculations needed to verify various plant processes. Examples include chemical dosing, retention time, pressure backwash flow rates and horsepower pump rates.

Noon – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **State Water Examination Review** – Instructors, Eddie Cope – Anne Arundel County DPW & Jay Price – City of Baltimore

This session is designed to review topics that may help those taking any of the State Water exams.

**Note: This is a fast paced review that is open only to those registered for the June 10, 2016 State exam.**

Or

1:00 – 5:00 p.m. **Pump Maintenance** – Instructor, Steve Justice – Geiger Pumps

An overview of mechanical maintenance on motors and pumps in the workplace is provided. Packing pumps, motor replacements and other topics will be discussed thoroughly.

5:00 – 6:00 p.m. **DINNER**

**WEDNESDAY**

8:00 – Noon **Water 3 & 4 State Examination Review** – Instructors, Eddie Cope – Anne Arundel County DPW & Jay Price – City of Baltimore DPW

This session is designed to review topics that may help those taking the Water 3 or 4 State examinations.

**Note: This is a fast paced review that is open only to those registered for the June 10, 2015 State Certification exam.**

OR

8:00 – 10:00 a.m. **Filtration Processes** – Instructor, Perry Violet – WSSC

This session will give the participant an introduction to operation and maintenance of various types of filters, including granular media and gravity filtration. In addition, design and operation of gravity and pressure filters will be discussed.

10:00 a.m. – Noon **Ultraviolet Light Disinfection** – Instructor, Perry Violet – WSSC

This session is designed to introduce Operational and Maintenance personnel to the concept of using ultraviolet light to disinfect drinking water. The UV disinfection process will be discussed, including operational demands and problems, measurement of UV, and the disinfection validation process. Various components of a UV process
will be identified, as well as operation and maintenance issues of the UV process.

Noon – 1:00 p.m.  LUNCH

1:00 – 5:00 p.m.  **Chlorination Technology** – Instructor, Terry Bradley – Anne Arundel County DPW

Session will cover the review of various disinfection technologies and discussion of the main types of chlorine application systems. Additional course topics are safety procedures for storage and use of chlorine tanks, current disinfection technologies, and the major physical and chemical characteristics of disinfection chlorine.

5:00 - 6:00 p.m.  DINNER

**THURSDAY**

8:00 – Noon  **Distribution Systems** – Instructor, Billy Dove – WSSC

The class will discuss water distribution systems. Among the topics discussed will be various types of water storage, hydraulic concepts of pressure and force, pressure reducing valves, booster pumps, and the importance of tank turnover, chlorination, and disinfection byproducts.

Noon – 1:00 p.m.  LUNCH

1:00 – 5:00 p.m.  **Applied Mathematics (continued)** – Instructor, Scott Harmon – Anne Arundel County DPW

This session will focus on basic mathematics and application fundamentals to the water treatment industry. Upon completion of this course, personnel should be able to perform calculations needed to verify various plant processes. Examples include chemical dosing, retention time, pressure backwash flow rates and horsepower pump rates.

5:00 – 6:00 p.m.  DINNER

**FRIDAY**

8:00 – 11:30 a.m.  **Final Short Course Exam**

**WATER CLASSES 3 & 4**

Course Coordinator: Dinesh Bahadursingh

**MONDAY**
8:00 – 8:30 a.m.  **Overview** – Course Coordinator, Dinesh Bahadursingh – WSSC

An overview of the Water 3 & 4 course will be presented; course objectives and TRE requirements will be discussed.

8:30 a.m. – Noon  **Chlorination Technology** – Instructor, Terry Bradley – Anne Arundel County DPW

This session will cover the use and safe handling of chlorine. Included in this discussion will be waterborne diseases, water-chlorine chemistry, disinfection methods, and operational factors that affect the disinfection process. Also included will be inspection of equipment, personal safety, health precautions, and emergency procedures.

Noon – 1:00 p.m.  **LUNCH**

1:00 – 5:00 p.m.  **Water Treatment Processes** – Instructor, Eddie Cope – Anne Arundel County DPW

This session will cover various water treatment processes including coagulation, sedimentation, disinfection, fluoridation, iron and manganese removal, softening, taste and odor control, and corrosion control. Water sources, chemicals used in water treatment and plant operations will also be discussed.

5:00 – 6:00 p.m.  **DINNER**

**TUESDAY**

8:00 – 10:00 a.m.  **Applied Mathematics** – Instructor, Jay Price – City of Baltimore DPW

This session will focus on basic mathematics and applications fundamental to the water treatment. Upon completion of this course, personnel should be able to perform calculations needed to verify various plant processes. Examples include chemical dosing, detention time, pressure calculations, backwash flow rates, and temperature conversions.

Noon – 1:00 p.m.  **LUNCH**

1:00 – 5:00 p.m.  **Water 3 & 4 State Examination Review** – Instructors, Eddie Cope – Anne Arundel County DPW & Jay Price – City of Baltimore DPW

This session is designed to review topics that may help those taking the Water 3 or 4 State examinations.

**Note:** This is a fast paced review that is open only to those registered for the June 7, 2014 State Certification exam.
1:00 – 5:00 p.m. **Pump Maintenance** – Instructor, Steve Justice – Geiger Pumps

An overview of mechanical maintenance on motors and pumps in the workplace is provided. Packing pumps, motor replacements and other topics will be discussed thoroughly.

5:00 – 6:00 p.m. **DINNER**

---

### WEDNESDAY

8:00 – Noon **Water 3 & 4 State Examination Review** – Instructors, Eddie Cope – Anne Arundel County DPW & Jay Price – City of Baltimore DPW

This session is designed to review topics that may help those taking the Water 3 or 4 State examinations.

**Note:** This is a fast paced review that is open only to those registered for the June 7, 2014 State Certification exam.

OR

8:00 – 10:00 a.m. **Filtration Processes** – Instructor, Perry Violet – WSSC

This session will give the participant an introduction to operation and maintenance of various types of filters, including granular media and gravity filtration. In addition, design and operation of gravity and pressure filters will be discussed.

10:00 a.m. – Noon **Ultraviolet Light Disinfection** – Instructor, Perry Violet – WSSC

This session is designed to introduce Operational and Maintenance personnel to the concept of using ultraviolet light to disinfect drinking water. The UV disinfection process will be discussed, including operational demands and problems, measurement of UV, and the disinfection validation process. Various components of a UV process will be identified, as well as operation and maintenance issues of the UV process.

Noon – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **Coagulation, Flocculation & Sedimentation** – Instructor, Scott Harmon – Anne Arundel County DPW

Session will cover the first three steps of conventional water treatment process; including rapid mixing, types of floculation, and sedimentation will be discussed.

5:00 – 6:00 p.m. **DINNER**
THURSDAY

8:00 – Noon  Distribution Systems – Instructor, Billy Dove – WSSC

The class will discuss water distribution systems. Among the topics discussed will be various types of water storage, hydraulic concepts of pressure and force, pressure reducing valves, booster pumps, and the importance of tank turnover, chlorination, and disinfection byproducts.

Noon – 1:00 p.m.  LUNCH

1:00 – 3:00 p.m.  Ozone Disinfection – Instructor, Doug Grimes – Fairfax Water

This session is designed to introduce Operational and Maintenance personnel to the concept of using ozone to treat drinking water. Attendees will be briefed on the history of ozone usage. The entire ozone treatment process will be discussed, including storing liquid oxygen, generating ozone on site, measurement of ozone residual, calculation of disinfection credit, and destructing excess ozone. Various components of the ozone process will be identified, as well as operation and maintenance of the ozone process.

3:00 – 5:00 p.m.  Water 3&4 Course Review – Instructor, Dinesh Bahadursingh – WSSC

This session will be a review of the week’s material in preparation for Short Course final exam.

5:00 – 6:00 p.m.  DINNER

FRIDAY

8:00 – 11:00 a.m.  Final Short Course Exam

ADVANCED WATER TOPICS
Course Coordinator:  Scott Harmon

MONDAY

8:00 - 8:50 a.m.  Overview – Instructor, Scott Harmon – Anne Arundel County DPW

An overview of the Advanced Water program will be presented and course objectives discussed. Course materials will be distributed and TRE requirements will be discussed.

9:00 - Noon  Water Distribution Systems – Instructor, Glynn Stoffel –
Course will cover information about distribution systems that all water treatment plant operators should know. Subjects included are system design and components, inspection and testing, water quality parameters and sampling, and distribution system operation and maintenance.

12:00 - 1:00 p.m.  **LUNCH**

1:00 - 5:00 p.m.  **Backflow Prevention** – Instructor, Steve Fox – Hydrocorp  
This course is designed to meet the needs of the water/wastewater professionals by focusing on the essentials of developing and managing an effective cross-connection control program. Topics include: legal authority, policies, record keeping, training and education, assembly standards, the elements of a good ordinance, and liabilities and responsibilities. In addition this course will also touch on Methods, Devices and Assemblies used in Cross Connection Control and ways to choose the proper containment or Isolations component.

5:00 - 6:00 p.m.  **DINNER**

---

**TUESDAY**

8:00 - Noon  
**Preparing for and responding to a terrorism incident from a Public Works perspective** – Instructor, Pete Steps – Anne Arundel County

What is terrorism? What is a PTE? What is a CBRNE incident? This course answers these questions and others. Topics discussed in this session will pertain to weapons of mass destruction, how to perform a vulnerability assessment of your facility and more.

12:00 - 1:00 p.m.  **LUNCH**

1:00 - 5:00 p.m.  **Advanced Filtration Processes: Theory and Practices** – Instructor, Patrick Foley – Sherwood Logan and Assoc.

With increased emphasis being placed on optimum filter performance by recent legislation, this session will cover all aspects of advanced filtration processes including granular media and gravity filtration. Included in this four hour session will be new design and rehabilitation of existing filters, media selection and design for particle removal, types of filter layouts, instrumentation and control, filter maintenance for optimum performance,
and troubleshooting when operations require. Comparisons will be made of different methods of backwashing and students will be able to observe cross sections of pilot filters during backwashing. Different types of underdrains and filter media will be available for hands on demonstration.

5:00 - 6:00 p.m.  **DINNER**

**WEDNESDAY**

**8:00 - Noon**

**Membrane Filtration and Reverse Osmosis Treatment**

Instructor, Ben Movahed – Watek Engineering

The theory and application behind operation and maintenance of Membrane Filtration and Reverse Osmosis Treatment systems. Problems associated with Membrane and Reverse Osmosis units will be discussed along with lab demonstrations which will be conducted.

12:00-1:00 p.m.  **LUNCH**

**1:00 – 5:00**

**Pumps** – Instructor, Jeremy Marine – Geiger Pumps

This course is designed to provide water professionals with a solid technical overview of hydraulics as well as a review of pump types, applications, advantages and disadvantages. Commonly used pumps for water treatment will be discussed. Issues surrounding mechanical seals and packing will also be covered.

5:00 - 6:00 p.m.  **DINNER**

**THURSDAY**

**8:00 - Noon**

**The Evolution of a Project: Water Treatment Plant Expansion, from Planning to Final Acceptance** – Instructor, Sharon Cole – Anne Arundel County

Operators sometimes aren’t involved in the project development process until they have to operate a new facility. That is typically too late to get the product that you want - and that is where operations staff make field
modifications to suit their needs. This class will discuss the planning and document creation that leads to a desired construction. Language for special provisions, reading specifications, how to read project plans and the understanding of “or equal” will be highlighted. Other components that will be presented are training (how much and by whom), warranties, operation and maintenance manuals, acceptance/performance, project and construction management by engineers.

12:00 – 1:00 p.m.  **LUNCH**

1:00 - 5:00 p.m.  **Instrumentation and Controls for the Operator** – Instructor, Gary Anderson – Sherwood Logan and Assoc

This class introduces the fundamentals of measuring, displaying and controlling important plant operating parameters such as levels, pressures, flows and dosages. Class discussions will center on automatic systems that actuate and adjust valve positions, motor speeds and chemical feeders.

5:00 - 6:00 p.m.  **DINNER**

**FRIDAY**

8:00-11:00 a.m.  **Final Short Course Examination**

---

**WATER DISTRIBUTION**  
Course Coordinator:  David Wilkins

8:00 – 8:30  **Orientation** – Instructor, David Wilkins – WSSC

An overview of the Water Distribution program will be presented and course objective discussed, and TRE requirements will be discussed.

8:30 – Noon.  **Safety** - Instructor, Pete Steps – Anne Arundel County DPW

The purpose of this course is to refresh and/or improve your safety skills. This course will emphasize construction safety. Topics will include confined space entry, trenching safety and the Right to Know.

Noon – 1:00 p.m.  **LUNCH**
1:00 – 5:00 p.m. **Water Treatment Processes** – Instructor, Eddie Cope – Anne Arundel County DPW

This session will cover various water treatment processes including coagulation, sedimentation, disinfection, fluoridation, iron and manganese removal, softening, taste and odor control, and corrosion control. Water sources, chemicals used in water treatment and plant operations will also be discussed.

5:00 – 6:00 p.m. **DINNER**

**TUESDAY**

8:00 - Noon **Math Skills** – Instructors, Wanda Kelner, Cathy Long, Rizalina Vicentte – WSSC

The purpose of this course is to refresh and/or improve your math skills in the area of distribution math as it relates to water calculations. You will learn how to compare ratios and proportion, solve for the unknown, and explore liner measurements, area and volume measurements.

Noon – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **Math Skills** – Instructors, Wanda Kelner, Cathy Long, Rizalina Vicentte – WSSC

The purpose of this course is to refresh and/or improve your math skills in the area of distribution math as it relates to water calculations. You will learn how to compare ratios and proportion, solve for the unknown, and explore liner measurements, area and volume measurements.

5:00 – 6:00 p.m. **DINNER**

**WEDNESDAY**

8:00 – Noon **Centrifugal Pumps and Components** – Instructor, Billy Dove – WSSC

Topics presented in this session include hydraulics of pumps as applied to the waterworks industry, pump operation and routine maintenance.

Noon – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **Centrifugal Pumps and Components (continued)** – Instructor, Billy Dove – WSSC
The class will discuss water distribution systems. Among the topics discussed will be various types of water storage, hydraulic concepts of pressure and force, pressure reducing valves, booster pumps, and the importance of tank turnover, chlorination, and disinfection byproducts.

5:00 - 6:00 p.m.  DINNER

THURSDAY

8:00 – Noon  **Valves and Hydrants** – Instructors, Mark Snyder and Mike Schakowsky – Mueller Co

The course will cover the safe operation and maintenance of fire hydrants and valves. Instruction will include a detailed description of parts and repairs to include the disassembly and assembly of valves and fire hydrants.

Noon – 1:00 p.m.  LUNCH

1:00 – 3:00 p.m.  **Course Review** – Instructor, Billy Dove – WSSC

This session will be a review of the week’s material in preparation for short course and/or the State test, along with some techniques on how to take a test.

3:00 – 5:00 p.m.  **Session Review & Test Taking Techniques** – Instructor, Billy Dove – WSSC

This session will be a review of the week’s material in preparation for short course and/or the State test, along with some techniques on how to take a test.

5:00 – 6:00 p.m.  DINNER

FRIDAY

8:00 – 11:00 a.m.  **Final Short Course Exam**

WASTEWATER COLLECTION

Course Coordinators:  Tom Newquist Sr. and Wayne Reed

MONDAY

8:00 – 8:30 a.m.  **Overview** – Instructor, Tom Newquist Sr. – City of Annapolis, Wayne Reed – DCWATER
An overview of the wastewater collection program will be presented and course objective discussed, and TRE requirements will be discussed.

8:30 - 9:30 a.m. **Force Main Inspection and Assessment** - Instructor, Travis Wagner, Vice President – Pure Technologies

The presentation will cover the risk based approach for the evaluation of wastewater force mains using non-destructive techniques and technologies in addition to advanced analytical methods. These techniques have been used by numerous force main owners throughout North America including local utilities. Case studies and lessons learned will be presented.

9:30 – 10:30 a.m. **Manhole Rehab** – Instructor, Robert, “Bob” Stockmaster, Vice President of Sales and Marketing – RFS Associates

Attendees will learn the significance of manhole frame – chimney leakage, other manhole leakage sources and how to identify them. Costs associated with treating excess flows, maintenance and other potential problems also will be covered. A variety of repair methods will be discussed, including the most recent technologies to enter the industry. Industry standards covering design life, product performance and acceptance testing will be reviewed to help ensure a successful manhole rehabilitation project.

10:30 – 11:30 a.m. **Collection System Basic Hydraulics** – Instructor, Jeff Pelletier, Principal Engineer – MWH Americas

Provide an overview of basic hydraulic principles that apply to gravity sewer flows as well as to pressure flows and pumping stations. For gravity systems, Manning’s Equation will be discussed and for pressure system’s, Bernoulli’s Principle will be explained. Example problems that require the application of these principles will be solved during the class.

11:30 – Noon **Review** – Instructor, Aaron Hughes, Project Manager – WSSC

Noon – 1:00 p.m. **LUNCH**

1:00 – 2:00 p.m. **Flow Monitoring** – Instructor, Jerome Vest, Project Manager – GOEL

Elements of open channel flow measurements (area and velocity, flumes, weirs) and flows through force mains (magnetic meters, pumps running timers) will be presented as a basis to establish baseline infiltration and peak wet weather flows.

2:00 – 3:00 p.m. **An Introduction to Asset Management** – Gian Cossa, Asset Manager – DCWATER

Asset Management is a comprehensive business program advocated by the US EPA and the utility industry to optimize infrastructure
It is essentially the practice of managing infrastructure capital assets to minimize the total cost of acquiring, operating and maintaining them, while improving service levels. The process involves incorporating detailed asset inventories, data management, related business processes and long-range financial planning to drive decision-making by optimizing the ability to prioritize capital program projects and preventive maintenance work.

3:00 – 4:00 p.m. **SSES//Private Property I/I** – Instructor, Paul Sayan, Technical Director – Louis Berger Water Services,

The presentation will explain the purpose of the SSES investigations including flow monitoring, CCTV and manhole inspections, smoke and dye testing. The presentation will also discuss how SSES investigations are related to private property inflow/ infiltration and general guidance to develop and implement a private property I/I reduction problem.

4:00 – 5:00 p.m. **Wastewater Pumping and Operations** – Wayne Reed Sr., General Foreman – DCWATER

Wastewater pumping and operations presentation will discuss wet well maintenance for settling, grease and odor control. Discussions will carry into the different types of wastewater pumping stations from temporary can type stations to more custom built stations with mechanical and support equipment for the pumping and screening operations.

5:00 – 6:00 p.m. **DINNER**

---

**TUESDAY**

8:00 – Noon **Disinfection & Chemical Feed Applications** – Instructor, Paula Martin, Water Treatment Plant Superintendent (ret.)

Effective chemical application is essential to the treatment of water and wastewater. This course will start with an open discussion of chemical feed applications in both the water and wastewater treatment fields.

Noon – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **Math Application** – Instructor, Paula Martin, Water Treatment Plant Superintendent (ret.)

A workshop focusing on calculating chemical feed dosages will follow. The workshop includes calculating the capacity of tanks, flow rates, and chemical dosages for disinfection, de-chlorination, odor control, coagulation, and corrosion control. Students will progress at their own pace through multiple and progressively more difficult quizzes.

5:00 – 6:00 p.m. **DINNER**
WEDNESDAY

8:00 – Noon  Centrifugal Pumps and Components – Instructor, Steve Elder

Topics presented in this session include hydraulics of pumps as applied to the waterworks industry, pump operation and routine maintenance.

Noon – 1:00 p.m.  LUNCH

1:00 – 5:00 p.m.  Centrifugal Pumps and Components (continued) – Instructor, Steve Elder – Delon Hampton & Associates (DHA)

5:00 – 6:00 p.m.  DINNER

THURSDAY

8:00 – Noon  Basic Chlorine and Chlorine Cylinder Program – Instructor, Susan McCauley - Maryland Environmental Services

OSHA permit required confined space; lock out tag out, basic chlorine, chlorine cylinder program, excavation and trench in safety.

Noon – 1:00 p.m.  LUNCH

1:00 – 3:00 p.m.  OSHA Permit Required Confined Space; Lock out Tag out and Excavation and Trench in Safety – Instructor, Susan McCauley – Maryland Environmental Services

3:00 - 5:00 p.m.  Exam Review – Instructor, Don Sprinkle (ret.)

5:00 – 6:00 p.m.  DINNER

FRIDAY

8:00 – 11:00 a.m.  Final Short Course Exam

Industrial Waste Treatment
Course Coordinator: Mike Kropp

MONDAY

8:00 – 9:00 a.m.  Course Objectives & Orientation – Instructor, Mike Kropp – Anne Arundel DPW

This session will provide an introduction to the course with an explanation of its objectives and attendance requirements. Each session covered in this course will be discussed along with resources available for review of course materials, and the examination format.
9:00 – 10:00 a.m. **Overview of Municipal/Industrial Pretreatment, Local Limit Development, Monitoring Requirements and Compliance Enforcement** – Instructor, Mike Kropp - Anne Arundel DPW

This session will provide a brief overview of the regulations governing treatment and how pretreatment is implemented in the State of Maryland. Discussions will include general and specific prohibitions, standards, and consequence of being classified as an SIU and reporting requirements.

10:00 – Noon **Overview of the Operator Certification Program Requirements** – Instructor: Lawrence Robinson – Maryland Department of the Environment (MDE)

This session will provide an overview of the operator certification requirements for waste treatment and pretreatment facilities with special emphasis on recent updates. Course participants will be provided an opportunity to participate in a question and answer session.

Noon – 1:00 p.m. **LUNCH**

1:00 – 2:00 p.m. **Overview of Municipal/Industrial Pretreatment, Local Limit Development, Monitoring Requirements and Compliance Enforcement** (continued)

2:00 – 4:00 p.m. **Prevention & Response to Violations** – Instructor, Ed Williams – Harford DPW

This class will discuss the most common causes of violations, investigative methods to develop a plausible response and plan of corrective measures as well as preventive methods. Proper Planning Prevents Poor Performance.

4:00 – 5:00 p.m. **Review of Days Topics** – Instructor, Mike Kropp – Anne Arundel DPW

5:00 – 6:00 p.m. **DINNER**

---

**TUESDAY**

8:00 – 10:00 a.m. **Filtration Processes** – Instructor, Joel Caudill – Harford County DPW

This session covers the history, design, maintenance and operation of filters to include multi – media filters. Math will be focused on in this session as it pertains to Process Filtration calculations.

10:00 – Noon **Chemical Feed** – Instructor, Joel Caudill – Harford County DPW
This session covers use of chemicals in the treatment of wastewater. Topics will include the chemicals used, application points and calculating chemical feed rates.

Noon – 1:00 p.m. **LUNCH**

1:00 – 3:00 p.m. **Pumps** – Instructor, Steve Justice – Geiger Pumps Inc.

Topic will cover the role of pumps in wastewater, routine maintenance and trouble shooting.

3:00 – 5:00 p.m. **Disinfection** – Instructor, Earl Ludy – Somerset County Sanitary

This course will identify and discuss different types of disinfection, including advantages and disadvantages of each method.

5:00 – 6:00 p.m. **DINNER**

---

**WEDNESDAY**

8:00 – Noon **Metals Precipitation** – Instructor, Ed Williams – Harford Co DPW & Instructor, Mike Kropp – Anne Arundel DPW

This course is designed to provide operations-oriented personnel with metals treatment responsibility, the opportunity to interact with similar personnel and to receive training in the theories, methods and practices of treating metals via precipitation in wastewater. The class will cover: 1) Sources of metals, (Contamination by metals of streams & sludges). 2) Chemical Concepts (pH theory & practice), (Coagulation & precipitation). 3) Treatment Facilities, (Pollution prevention/waste minimization), (Typical chemical processes, instrumentation & Process control & operation). 4) Interactive activities, (description of student facilities).

Noon – 1:00 p.m. **LUNCH**

1:00 – 3:00 p.m. **Safety – MSDS and LOTO** – Instructor, Jim Hynes, Collection System Superintendent – Harford County DPW

MSDS, Right to Know Law OSHA (29 CFR 1910.1200) and MOSH (COMR 09.12.33.04) will be discussed. LOTO – having a successful Lock-Out/ Tag-Out program.

3:00 – 4:00 p.m. **Course Review** – Instructor, Mike Kropp – Anne Arundel DPW

4:00 – 5:00 p.m. **Final Exam** – Physical/Chemical Treatment

5:00 - 6:00 p.m. **DINNER**

---

**THURSDAY**
8:00 – 9:00 a.m. **Principles of Biological Treatment** – Instructor, Chris Younger, Wastewater Superintendent – Harford County

This section will cover the wastewater characterization, an introduction to biological treatment systems, and basic microbiology.

9:00 – 10:00 a.m. **Anaerobic Treatment Processes** – Instructor, Chris Younger, Wastewater Superintendent – Harford County

The principles of anaerobic treatment will be reviewed. This session will include a discussion of the different types of anaerobic systems, selection criteria, and the advantages and disadvantages of each type. Basic calculations specific to these systems will be covered. An overview of equipment and layouts associated with anaerobic systems will be presented along with a discussion of system O&M issues.

10:00 – Noon. **Aerobic Treatment I** – Instructor, Chris Younger, Wastewater Superintendent – Harford County

The principles of aerobic treatment will be reviewed. This session will include a discussion of the activated sludge theory, and reactor configurations; complete mix, plug flow and batch. Basic calculations specific to these systems will be covered.

Noon – 1:00 p.m. **LUNCH**

1:00 – 2:00 p.m. **Fixed Film Systems** – Instructor, Ed Williams – Harford County DPW Mike Kropp, Anne Arundel DPW

The application of fixed film systems for treatment will be reviewed. This session will include a discussion of the different types of fixed film treatment systems, selection criteria, and the advantages and disadvantages of each type. An overview of equipment and layouts associated with fixed film systems will be presented along with a discussion of system O&M issues.

2:00 – 3:00 p.m. **Sludge Handling & Disposal** – Instructor, Mike Kropp – Anne Arundel DPW

Topics included in this session will be sludge thickening stabilization, dewatering, storage and disposal. Chemicals used as aids in these processes will be discussed.

3:00 – 4:00 p.m. **Course Review** – Instructor, Mike Kropp – Anne Arundel DPW, Ed Williams – Harford Co DPW

4:00 – 5:00 p.m. **Final Exam** – Biological Treatment

5:00 – 6:00 p.m. **DINNER**
**Introductory/Intermediate Wastewater**
Course Coordinators: Marshall Phillips and Jim Hynes

8:00 – 8:50 a.m. **Orientation** – Instructor, Marshall Phillips – City of Baltimore, Instructor, Jim Hynes – Harford County DPW

During this period, course materials will be distributed, the TRE requirements discussed and an overview of the curriculum outlined.

9:00 – Noon. **Advanced Treatment** – Instructor, William Shreve – Director, DPW, Charles County, MD

Methods of nutrient removal, sand filtration, and other advanced treatment processes will be discussed.

12:00 – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **Activated Sludge Process Control** – Instructor, Lenny Gold – Gold & Associates

This session will teach specific techniques for monitoring and controlling activated sludge processes. Trend charting, microscope examination of biomass, and other process control techniques will be taught. Case study analysis of activated sludge process problems will be undertaken on a time-available basis.

5:00 – 6:00 p.m. **DINNER**

**TUESDAY**

8:00 – Noon **Intermediate Math** - Instructor, Scott Harmon – Anne Arundel County DPW

Computation of typical wastewater problems will be emphasized. Detention times, flow rates, dosage rates, loading rates, and other typical wastewater formulas will be covered.

12:00 – 1:00 p.m. **LUNCH**

1:00 – 2:50 p.m. **Disinfection** – Instructor, Earl Ludy – Somerset County Sanitary Distribution

This course will identify and discuss different types of disinfection, including advantages and disadvantages of each method.
3:00 – 5:00 p.m.  **Safety** – Instructor, Burt Sklar – Chugach at Ft. Meade

Proper use of safety equipment, working in confined spaces, lockout programs, chlorine handling and chemical safety will be covered.

5:00 – 6:00 p.m. **DINNER**

**WEDNESDAY**

8:00 – Noon  **Pumps** – Instructor, John Weis – MM Engineering

Topics to be covered include pumps and their role in wastewater, as well as routine maintenance and trouble shooting.

12:00 – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m.  **Sludge Thickening & Digestion** – Instructor, Bill Farrell – MEI / RTS / Prostart

Aerobic and anaerobic digestion will be discussed, including advantages and disadvantages of each. Process monitoring and troubleshooting will be emphasized.

5:00 – 6:00 p.m. **DINNER**

**THURSDAY**

8:00 – Noon  **Wastewater Overview** – Instructor, Marshall Phillips – City of Baltimore – Back River W.W.T.P. and Jim Hynes – Harford County DPW

Q&A on topics covered during the week so far, as well as pre-test review relating to certification topics will be discussed.

12:00 – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **Wastewater Lab** – Instructor, Dale Baker – Garrett County

Lecture, demonstration and hands-on training on pH, temperature, DO using meters and Winkler method, chlorine using amperometric titration, and DPD-FS end spectrophotometer.

5:00 – 6:00 p.m. **DINNER**

**FRIDAY**

9:00 – 12:00 a.m. **State Certification Examination**
**Advanced Wastewater**
Course Coordinator: Darryl Noakes

**MONDAY**

8:00 – 9:00 a.m. **Overview** – Instructors, Darryl Noakes – AECOM
An overview of the Advanced Wastewater program will be presented and course objectives discussed. Course logistics and TRE requirements will be discussed.

9:00 – Noon **An In-Depth Look at ENR** – Instructor, Marty Johnson – WSSC
This 2-day course is designed to give the operator highly-detailed training on the biology and chemistry behind Enhanced Nutrient Removal. Operation and control of various treatment plant processes will be discussed. Training will also include diagnosing the plant performance and optimization through monitoring, testing, equipment changes, and chemical addition. Interpretation of data and operational problems/remedies will be presented.

Noon – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **An In-Depth Look at ENR (continued)** – Instructor, Marty Johnson – WSSC

5:00 – 6:00 p.m. **DINNER**

**TUESDAY**

8:00 – Noon **An In-Depth Look at ENR (continued)** – Instructor, Marty Johnson – WSSC

Noon – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **An In-Depth Look at ENR (continued)** – Instructor, Marty Johnson – WSSC

5:00 – 6:00 p.m. **DINNER**

**WEDNESDAY**

8:00 – Noon **Side Stream Treatment.** - Tiffany Bain – Geiger Pumps
This course will discuss the challenges associated with recycling side streams into the treatment process and discuss various options for treatment of the streams.

Noon – 1:00 p.m. **LUNCH**

1:00 – 5:00 p.m. **Nutrient Removal via Chemical Application** – Instructor, Smith Turner – SNF Polydyne

This course will provide an overview of why nutrient removal is necessary along with a brief Review of Chesapeake Bay regulations. A summary of negative impacts resulting from nutrient loading including discussions on treatment processes and chemicals used for Nutrient removal.

5:00 – 6:00 p.m. **DINNER**

**THURSDAY**

8:00 – Noon **Biological Components of Wastewater** – Instructor, Cynthia Bland, REM, CEP – PEER Consultants, P.C.

This 1-day course will review the wide variety of pathogens that are present in wastewater, sludge, foam, compost, aerosols and contaminated surfaces and present potential and actual risks to wastewater personnel. Pathogens reviewed include viruses, bacteria, fungi, protozoa and helminthes (worms) as well as allergens, endotoxins and exotoxins. Topics presented include: an overview of relevant history, hazards and organisms; aerosols, compost, foam and sludge; disease transmission and the body's defenses; removal, inactivation and destruction of pathogens; hygiene measures, protective equipment and immunizations. The course will also cover organism identification and the effects of the presence, absence, mobility, and organism type on wastewater process control as well as microscopic features will be included as an overview of sampling.

Noon – 1:00 p.m. **LUNCH**

1:00 – 4:00 p.m. **Biological Components of Wastewater (continued)** – Instructor, Cynthia Bland, REM, CEP – PEER Consultants, P.C.

4:00 – 5:00 p.m. **Course Review**

5:00 – 6:00 p.m. **DINNER**

**FRIDAY**

8:00 – 11:00 a.m. **Final Short Course Examination**
Superintendents / Managers
Course Coordinators: Winfield McKell and Mike Lewis

MONDAY

8:00 – Noon **Biosolids Management in Maryland & Technology** – Instructor, Bob Wimmer – The Energy Systems Group

This course will provide Superintendents and Chief Operators with the knowledge and experience to address changes in the Maryland Biosolids Regulations and Nutrient Management Plans. The course will focus on how the new regulations impact biosolids management and the stabilization options to meet the new regulations. The course will also address new technologies that can be used to address issues associated with P in biosolids.

1. Introduction and Review of Relevant Regulations
   a. EPA Part 503
   b. MD Biosolids Regulations
   c. Nutrient Management Planning
   d. P Control

2. Anaerobic Options for Stabilization
   a. Mesophilic AD
   b. Thermophilic AD
   c. Thermal Hydrolysis
   d. Pasteurization

3. Aerobic Options for Stabilization
   a. Aerobic Digestion
   b. ATAD

4. Chemical Options for Stabilization
   a. Lime
   b. Lime and Heat
   c. Lysotek
   d. Other Chemical Approaches

5. Drying
   a. Drying Technologies
   b. Heat and Energy Balance
6. Nutrient Management of Biosolids
   a. Ostara
   b. Dewatering Impacts
   c. Bound P

7. Open Discussion

Noon – 1:00 p.m.  LUNCH

1:00 – 5:00 p.m.  **Energy Management for Water and Wastewater** – Instructor, Rob Taylor – WSSC

This course will provide Superintendents and Chief Plant Operators with the knowledge and experience to optimize energy usage and provide a good understanding of supply and demand side energy management. The course will focus on electricity usage, tracking and efficiency performance measurement, pumps and pumping systems, aeration systems, and energy performance contracting. The course will also provide a background in renewable energy – hydro, wind, solar, and biogas- as it relates to plant performance and cost reduction. Actual plant case studies will be used to provide examples.

**TUESDAY**

8:00 – 5:00 p.m.  **Leadership Through Customer Service** – Instructor, Angela Ballard-Landers – WSSC

Course Objectives:

- Improve supervisory skills by understanding good leadership behaviors
- Learning the difference between Leadership and Management
- Polishing Interpersonal Skills and Communication Skills
- Handling Your and Other People's Stress
- Empowering, Motivating and Inspiring Others
- Leading by Example

**WEDNESDAY**

8:00 – Noon  **Drinking Water System Challenges** – Instructor, Hans Hairston – WSSC

The purpose of this course is to discuss the challenges and obstacles that the water industry faces now and in the future concerning water treatment, regulations and technology.

Course Outline

Noon – 1:00 p.m.  LUNCH
Managing for the First Time Manager — Instructor, Perry A. Violet – WSSC

The purpose of this Managing for the First Time Manager training is to provide the attendee with the skills and knowledge needed to effectively and efficiently coordinate his/her workforce.

THURSDAY

8:00 – Noon

Applied Hydraulics — Instructor, David Hall – WSSC

This course will provide Superintendents, Chief Plant Operators and managers with the knowledge of hydraulics as it pertains to static and dynamic conditions flow measurements, pump systems and horsepower in water treatment conditions.

Noon – 1:00 p.m.

LUNCH

1:00 – 5:00 p.m.

Source Water Protection and Reservoir Management — Instructor, Clark Howells – City of Baltimore

This course will provide Superintendents and Chief Operators a general understanding of source water protection strategies and the general principals of reservoir management. The course will discuss threats to source water supplies and how to conduct a source water assessment of a catchment area. The course will cover point and non-point pollution and the affect that various pollutants have on source water supplies. Finally, the course will discuss reservoir dynamics and the proper design of intake structures.

5:00 – 6:00 p.m.

DINNER
2016 Water & Wastewater Operators Short Course Committee Members

Chairperson: Ed Williams (CWEA), Harford County

Chairperson-Elect: Rob Swann (CSAWWA), Anne Arundel County DPW

Treasurer: Noelle Anuszkiewicz (CWEA), Anne Arundel County DPW

Secretary/Assist Treas: Angela Ballard-Landers (CSAWWA), WSSC

Water: Dinesh Bahadursingh (CSAWWA), WSSC
Scott Harmon (CSAWWA, CWEA), Anne Arundel County DPW
Jay Price (CSAWWA), Baltimore City DPW
Rob Swann (CSAWWA), Anne Arundel County DPW

Wastewater: Noelle Anuszkiewicz (CWEA), Anne Arundel County DPW
Bill Farrell (CWEA/WWOA, CSAWWA), MEI/RTS/Prostart
James Hynes (WWOA), Harford County
Darryl Noakes (CWEA), AECOM
Marshall Phillips (WWOA), Baltimore City DPW

Water Distribution: David Wilkins (CSAWWA), WSSC

Collection Systems: Tom Newquist (WWOA), City of Annapolis
Wayne Reed (CWEA), DC WASA

Industrial Waste: Mike Kropp (CSAWWA), Anne Arundel County DPW
Ed Williams (CWEA), Harford County

Managers/Superintendents: Joseph (Michael) Lewis (CSAWWA), WSSC
Winfield McKell (WWOA), WSSC

Admin. Coordinators: Clark Howells (CWEA), Baltimore City DPW
John Luu (CWEA), WSSC
Conrad Shows (WWOA), DC WASA (Retired)
Ivy Swann (WWOA)

College Liaisons: James (J.C.) Langley (CSAWWA), WSSC
James Timmons (WWOA), Baltimore City DPW (Retired)

Short Course Instructors
We offer our thanks to each instructor who is giving of their time and effort without monetary compensation to convey this beneficial information to the respective students. Also, thanks to the companies who have allowed the instructors time to participate in the Short Course. You will find the names of the instructors with the classes they are teaching.
